Lake|Flato: Nature|Place|Craft

Thursday, October 10
9:30am - Memorial Union North
Stotler Lounge 2 & 3

Andrew Herdeg, Partner, Lake Flato

Andrew Herdeg, AIA, has a background in regional sustainable design that translates into buildings that respect nature, enhance place, and exhibit the craft of construction. A design architect with Lake|Flato since 1996 and a partner since 2003, his projects have included private residences in Santa Fe and Texas, arboretums in Maryland and Louisiana, and educational projects across the country. As the firm's Partner-in-Charge of Higher Education, Andrew's buildings respond to each unique site and environmental context, enhance place, and exhibit the craft of construction. He is passionate about designing buildings that create more cohesive and pedestrian-oriented campuses that foster healthy social and academic communities.

In 2008-2009, he completed Indiana's first LEED Gold certified project for DePauw University, as well as 250,000 square feet of academic space for the LEED Gold rated Arizona State University Polytechnic campus in Mesa, Arizona, which was awarded an AIA Committee on the Environment Top Ten Green Project award and a National Design Award from the AIA Committee on Education.

Andrew is a member of the American Institute of Architects, the Texas Society of Architects, the Society for College and University Planning, and the Urban Land Institute. He received his Masters in Architecture from The University of Texas at Austin in 1992, and his Bachelor of Arts from Colby College in Maine.
